Dropped Down Tube

What It Is:

Down tube is dropped closer to the front tire, reducing the gap

How It Works:

Leading edge of the down tube integrates with the trailing edge of the front wheel

Performance Benefit:

Improved aerodynamics

Notes:

May or may not include a fork "chin" feature

Aero Cable Management

What It Is:

Cables enter the frame via aerodynamically strategic routes

How It Works:

Smart cable paths reduce aero drag

Performance Benefit:

Improved aerodynamics

Evolved Steerer Design

What It Is:

The right diameter in the right application

How It Works:

Steerer diameter is engineered with optimum properties for the frameset

Performance Benefit:

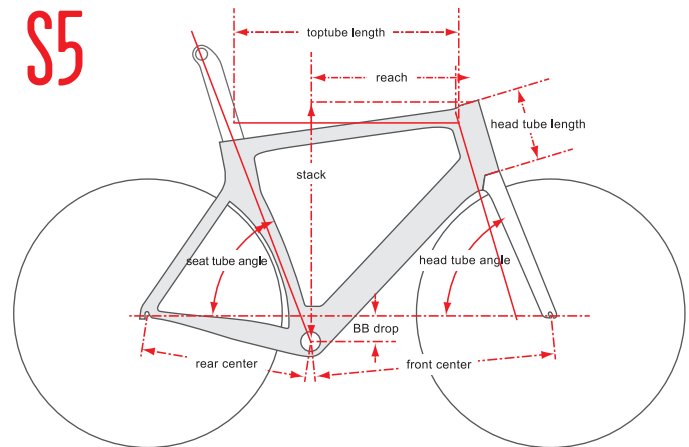

Platform-specific balance between weight, aerodynamics, stiffness, and comfort
